

How to add a child window to MIB2:

Replace text in red with names of your child function

1. Copy `mibChildController.m` to MIB\Classes\@`mibChildController` [`@mibStatisticsController`]
2. Rename in `mibChildController.m` name of GUI window
All `mibChildController` to `mibStatisticsController`
`guiName = 'mibChildGUI';` [`mibStatisticsGUI`]
3. Copy `mibChildGUI.m` and `mibChildGUI.fig` to MIB\GuiTools as `mibStatisticsGUI.m` and `mibStatisticsGUI.fig`
4. Open `mibChildGUI.m` (`mibStatisticsGUI.m`) and
Rename all `mibChildGUI` to `mibStatisticsGUI`

add if it is not there

add to the `_OpeningFcn`

`% obtain controller`

`handles.winController = varargin{1};`

`% resize all elements x1.25 times for macOS`

`mib_rescaleWidgets(handles.mibChildGUI);`

add to the `_CloseRequestFcn`

`handles.winController.closeWindow();`

5. go to button callback of `mibGUI.m` that should open a child window and add

`handles.mibController.startController('mibChildController');`

6. Open `mibChildGUI.fig` (`mibStatisticsGUI.fig`) and rename Tag to `mibStatisticsGUI` and `CloseReqFcn` to `mibStatisticsGUI_CloseRequestFcn`

Add methods to deal with `mibChildGUI.m` to `mibChildController`
